As a former Uber driver, I scaled Gridwise.io's product for 1M Gig-workers, gaining insights related to Instacart's shopper community. Now in a rotational program at Highmark Health enGen, I lead AI initiatives impacting 10,000 employees. With software bootcamp training, I'm excited to bring my user empathy and technical expertise to Instacart's APM program to help make grocery access more equitable for all.

Experience

IT Business Analyst
